OUR HERITAGE

Through our high technical knowledge and wide experience, we were successful in supplying best in class equipment to our valued customers in the MENA region, taking in consideration our customer business nature and locations.

Vision :

Our vision is driven by our passion for exceeding the expectation of our most valued assets – our customers, our employees, and our business partner while being a professionally managed, profitable organization with core values and ethics.

Mission:

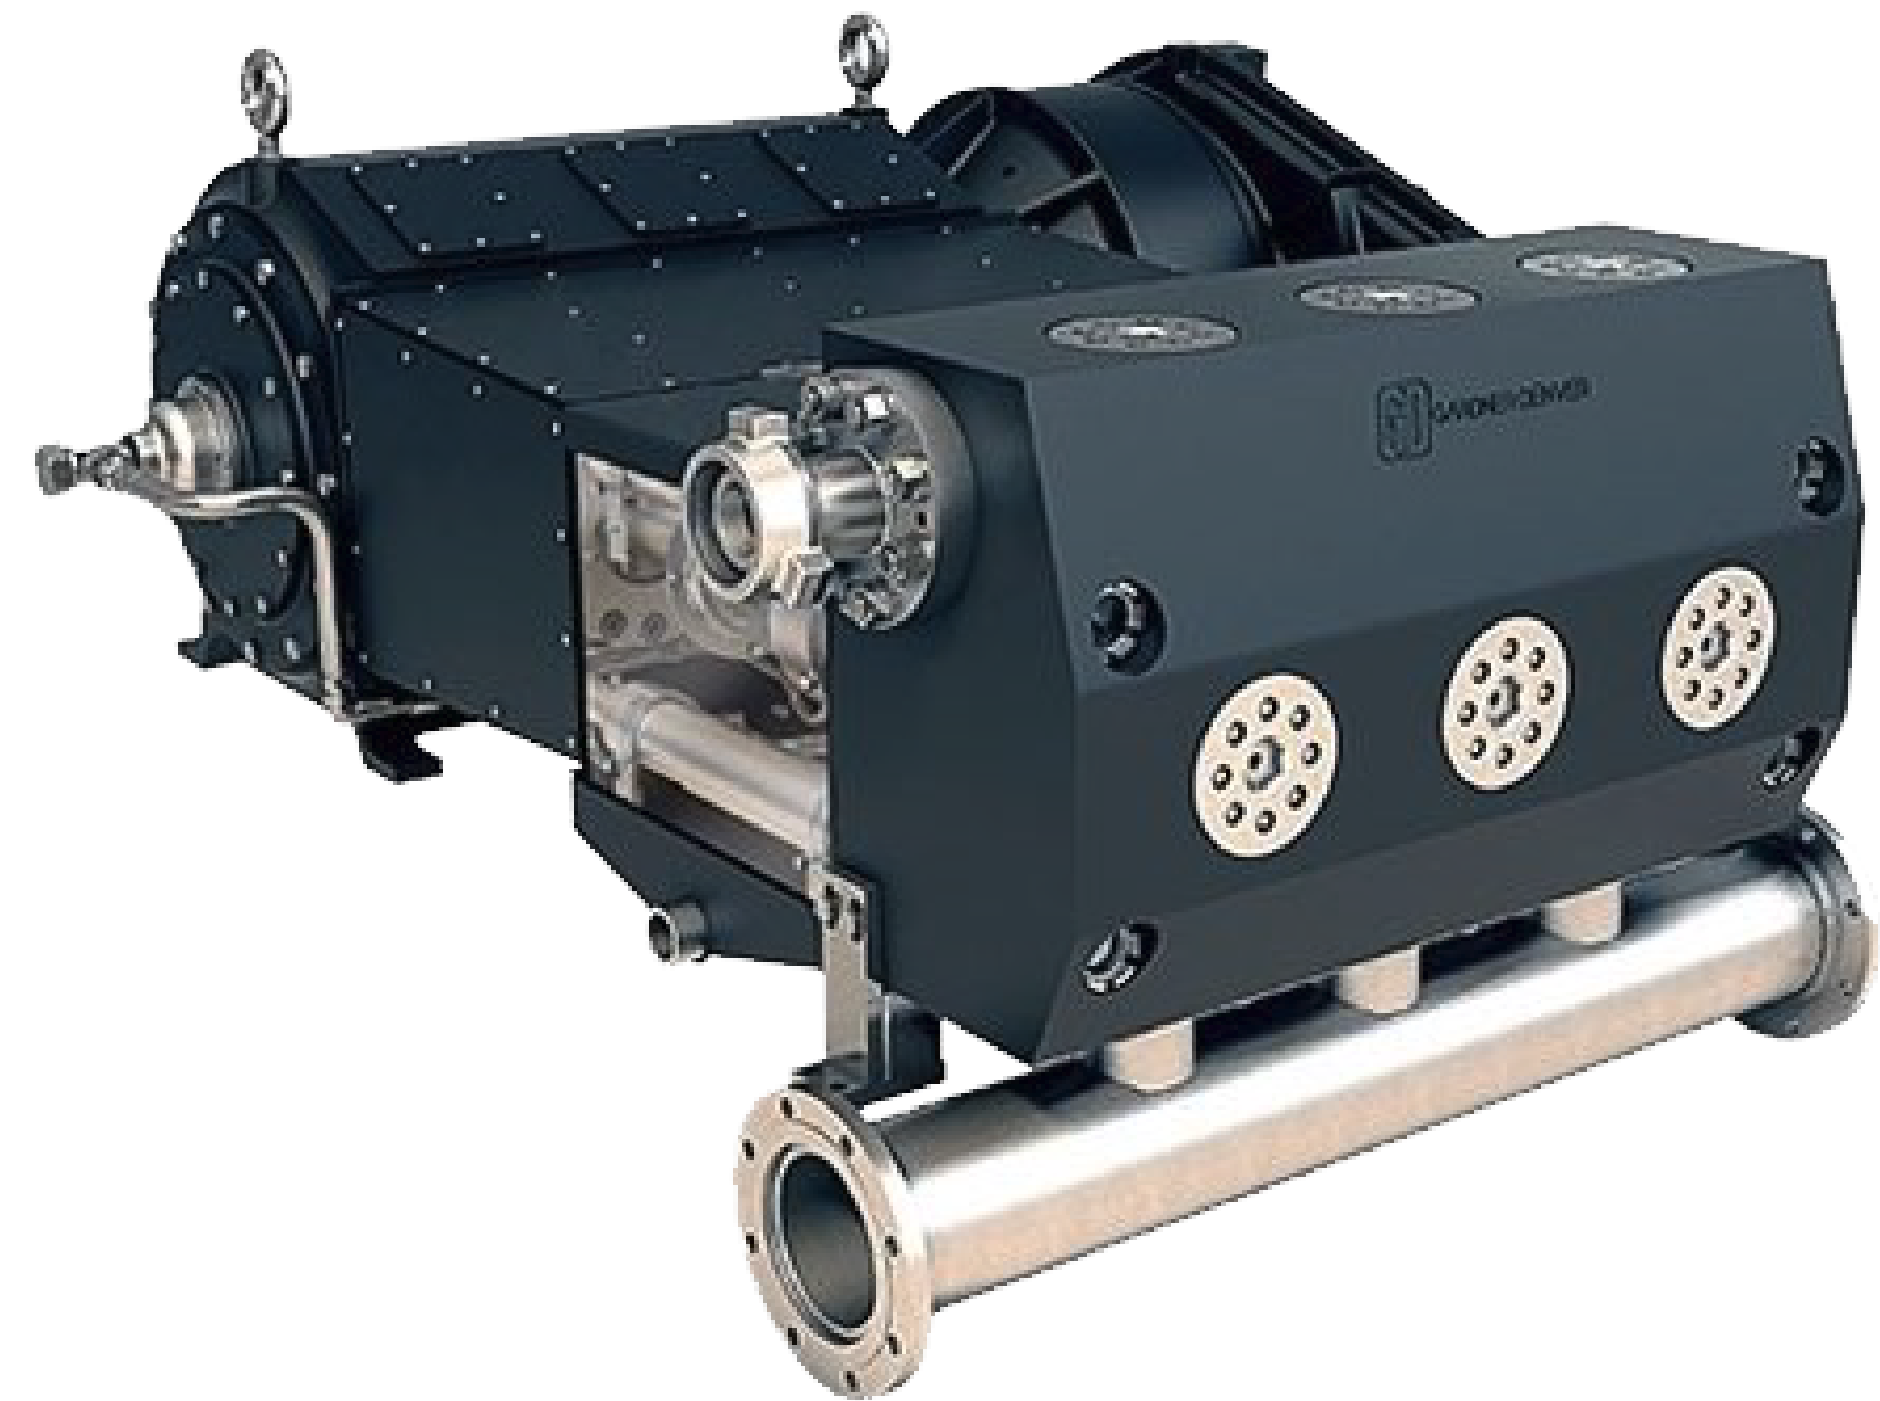

Our Mission is to be the most preferred solution & service provider for Oil & Gas and Industrial products in the space of compressed Air, Power, Mechanical transmission, and industrial pumps by offering an innovative and end-to-end solution to support our customer needs for their competitive business advantage.

PUMPS

In the O&G industry, We represent world leading companies with the highest industry reputation. We have the highest durable pumps that can work in harsh field environments and meets API and ATEX specification.

- *Frac Pumps*
- *Mud Pump*
- *Well Service Pump*
- *Horizontal Drilling Pumps*
- *API process Pumps*
- *API Pump skid packages*
- *Condensate recovery systems*
- *Water & Wastewater*
- *Submersible Pump*

BEARING

Our engineered bearings feature precision tolerances, proprietary internal geometries and quality materials. Our tapered, spherical, cylindrical, thrust, ball, plain, miniature, precision and housed unit bearings deliver strong performance, consistently and reliably.

- *Adapt Roller Bearing*
- *Ball Bearing*
- *Cylindrical bearing*
- *Spherical bearing*
- *Aerospace Bearing repair*
- *Tapered roller bearing*
- *Thrust bearing*
- *All other types of special bearing Industrial & O&G.*

AIR COMPRESSOR

Our high pressure air and gas reciprocating air compressors offer a unique range of applications. Pressures of this machine range from 36-6005 psig. Available as air or water cooled units, 7 different models are offered as well custom engineered packages. Custom packages are built to meet customer's requirements and specifications to maximize productivity for their applications.

- *High Pressure Application*
- *Medium Pressure Application*
- *Breathing Air Compressor*

AIR COMPRESSOR SPARE PARTS

We provide our customer with Genuine Spare Parts for Air Compressor including all technologies with specialty and our high expertise in centrifugal Air Compressor.

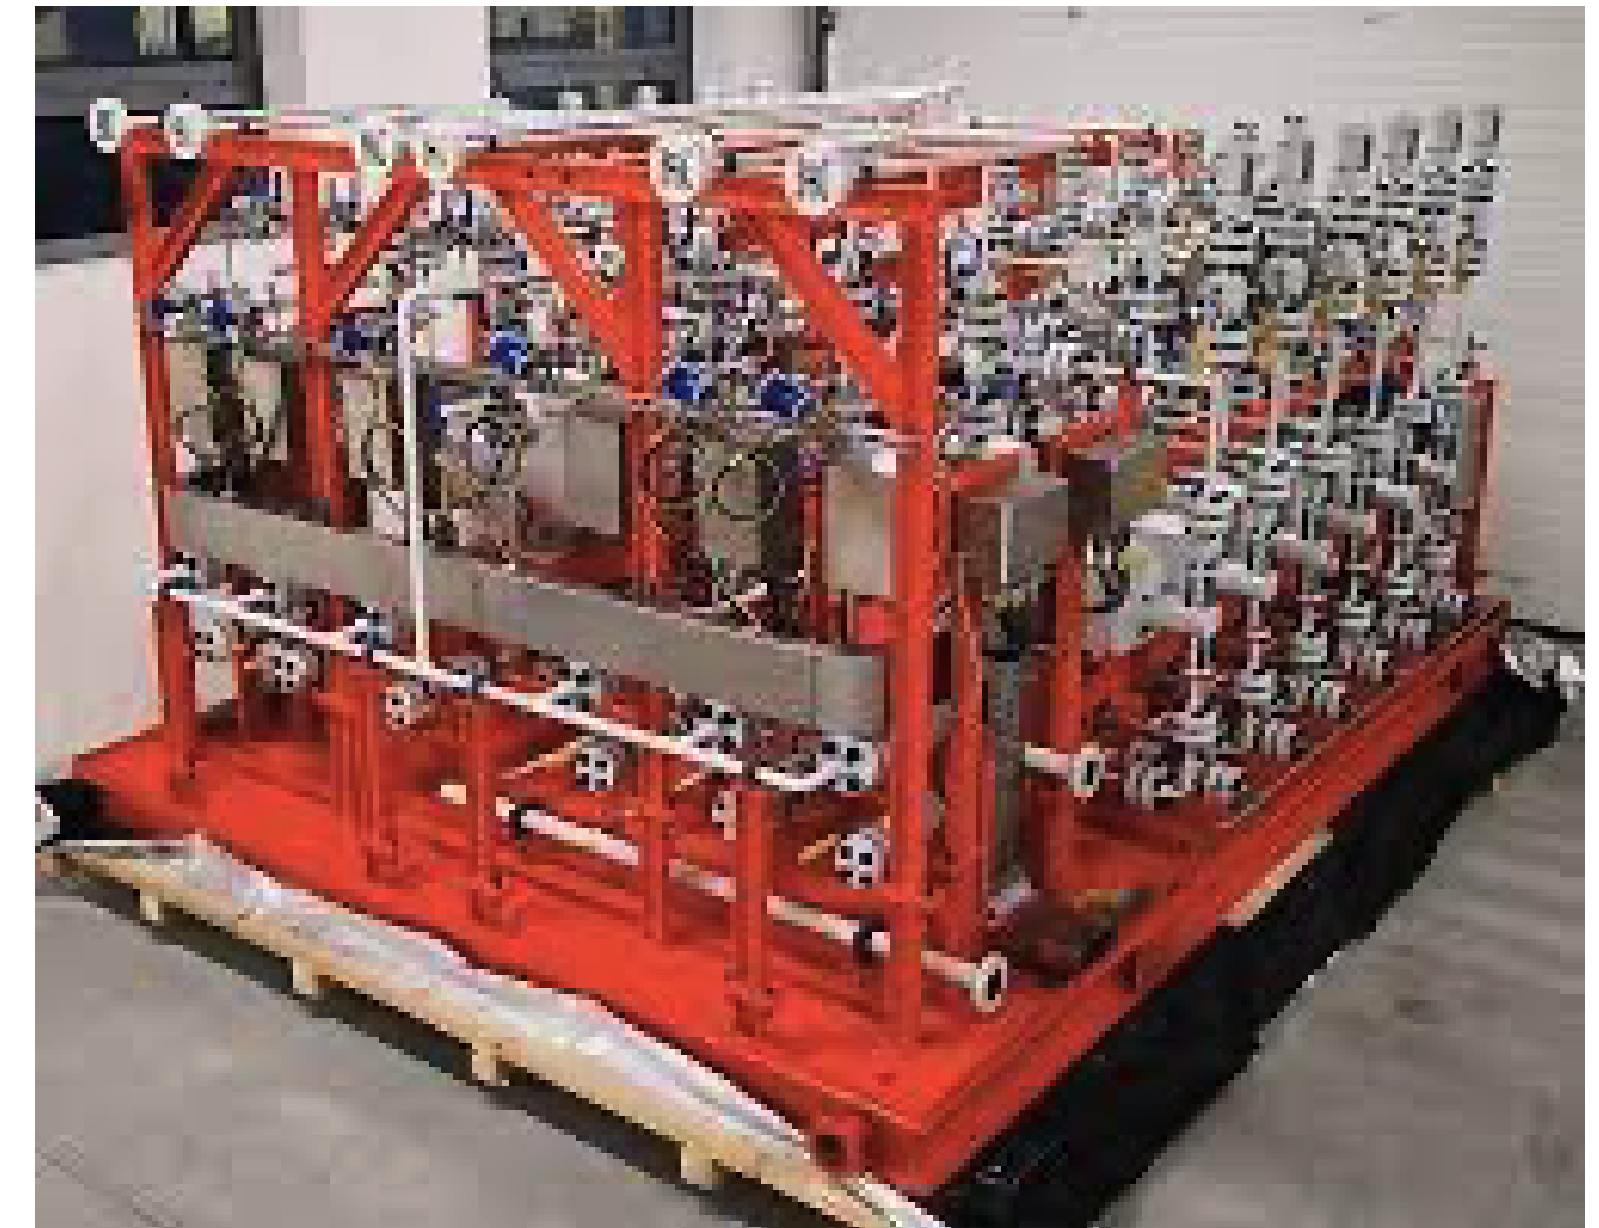

- *Centac – centrifugal*
- *Screw Oil Injected*
- *Screw Oil Free*
- *Reciprocating*
- *Full downstream equipment*
- *Condensate management*

CUSTOMIZED SOLUTIONS

- *API Chemical Injection Skid*
- *Fuel Gas*
- *Filtration Unit*
- *Gas Treatment package*
- *Service Gas storage & pack up*
- *API 12k indirect heater*
- *API 12L Emulsion Traters, Desalters, Separators*
- *Custody transfer metering*
- *Flare ignitions*
- *Gas dehydration & purification*
- *Slug Catcher*

CUSTOMIZED SOLUTIONS

products customized for the task at hand, and for the physical space they will operate in. Typical ranges are air compressor systems up to 75 m³/min and 50 bar, and high-pressure systems up to 3000 bar.

Pump systems 5-650 kW and up to 3000 bar (43500 psi) Piston

- Pumps Cleaning
- Pressure testing
- Hydro jetting
- Flushing Chemical injection

Compressor systems 30-650 kW, 7-35 bar and up to 75 m³/min (2650 cfm) Screw compressors

- Sand blasting
- Well testing
- Pipe drying
- Pressure testing
- Instrument
- Air Nitrogen generation

HEAT EXCHANGER

Aluminum Heat Exchangers (also known as Plate Fin Heat Exchangers) and Cold Boxes are at the heart of low temperature natural gas, air separation and petrochemical processes worldwide.

Continuous innovation and investment in our technology and capacity enables our customers to maximize their opportunities. Notable Chart firsts include the introduction of vacuum brazing, Core-in-Kettle[®], mercury tolerant construction and Smart Layer[®].

ULTRASONIC PLANT RELIABILITY & ENERGY CONSERVATION

*Your Partner in Energy Conservation & Equipment Reliability
Using Ultrasound Technology*

- *Leak detection equipment*
- *Electrical inspection equipment*
- *Valve inspection equipment*
- *Mechanical inspection equipment*
- *Online monitoring equipment & software*
- *Level I & Level II courses with certification*
- *Steam Trap Examiner Training with certification*

MEASUREMENT SYSTEM

Our gauges are immune to many of the problems experienced with other technologies because they do not come into contact with the process (non-intrusive), and mount externally to the vessel, mold, pipe or conveyor, often with no modifications required. This technology is ideal for processes: involving high temperature, viscous, non-conductive, hazardous or toxic materials, contained in sealed vessels or pipes, and also for installations where cost is a concern.

- *Point level measurement*
- *Mass flow measurement*
- *Interface level*
- *Mold level system*
- *Weight measurement*
- *density measurement system*
- *Continuous level measurement*

TORQUE WRENCHES

Our Torque Systems is the leading manufacturer of pneumatic, battery-powered, and electronic pistol grip torque wrenches.

Our Torque products have proven to be successful all over the world in such industries as oil and gas, mining, aerospace, wind power and manufacturing.

- *RAD Pneumatic*
- *E-RAD BLU*
- *B-RAD Battery*
- *V-RAD Electric*
- *Audit Equipment*
